Mumbai, Maharashtra

## CAREER OBJECTIVE

I want to grow by applying my current knowledge & innovating the existing product. In the process, I want to not only explore new things but also become a valuable addition to the company.

## PROJECTS

### 1. To-do List

Created a web application called "Todo List" using ReactJS, where user has to enter his/her desired tasks and can remove after completion. A live counter shows how many tasks have left.

### 2. Survey App

Created a web application called "Survey App" using ReactJS, where user has to enter his/her name and answer some survey questions. on submit, answers will be saved on firebase server with users name.

### 3. Course Purchase App

Created a web application called "Course purchase app" using ReactJS, where user has to select certain courses from a list and their live total price will be displayed below the list.

### 4. There for you

Created a "There for you" website's frontend using HTML, CSS, Javascript.

## SKILLS
